

Job Title: NestJS Developer

Job Type: Full-Time | On-Site

Location: Thane Wagale estate

#### Job Overview:

We are seeking a skilled NestJS Developer with strong backend development expertise to build scalable APIs and robust server-side applications.

#### Key Responsibilities:

- 1) Develop RESTful APIs and GraphQL Micro services using NestJS.
- 2) Integrate server-side logic with front-end components.
- 3) Manage databases (MySQL/MongoDB/ClickHouse) and ensure efficient queries.
- 4) Implement security, authentication, and authorization mechanisms.
- 5) Optimize application performance and debug issues.
- 6) Write clean, reusable code with unit tests.

#### Requirements:

- 1) Proficiency in JavaScript/TypeScript and NestJS.
- 2) Experience with Node.js and databases like MySQL, MongoDB, ClickHouse, etc.
- 3) Knowledge of testing frameworks (NestJs) and microservices architecture.
- 4) Familiarity with CI/CD pipelines, Docker, and cloud platforms (AWS/Azure).
- 5) Strong problem-solving and teamwork skills.

#### Bonus Skills (Preferred):

- 1) WebSocket or real-time data experience.
- 2) Basic knowledge of frontend frameworks like Angular/React.

Salary Bracket is 3 LPA to 4 LPA .
