Job Title: Full Stack Developer (AngularJS, NestJS, MongoDB)

Experience Required: Minimum 1 Year

Employment Type: Full-Time

Job Summary:

We are looking for a passionate and skilled **Full Stack Developer** with at least **1 year of hands-on experience** in developing web applications using **AngularJS** on the frontend, **NestJS** on the backend, and **MongoDB** as the database. The ideal candidate should be able to take ownership of features and work independently or as part of a team to deliver high-quality, scalable solutions.

Key Responsibilities:

- Develop and maintain web applications using AngularJS, NestJS, and MongoDB.

- Design and implement RESTful APIs using NestJS.

- Create dynamic and responsive user interfaces with AngularJS.

- Optimize application performance and ensure high responsiveness.

- Integrate frontend and backend components seamlessly.

- Write clean, maintainable, and well-documented code.

- Collaborate with UI/UX designers, other developers, and product managers.

- Participate in code reviews, testing, and debugging.

- Manage database schema design and optimization using MongoDB.

- Ensure application security and data protection best practices are followed.

Required Skills & Qualifications:

- **Minimum 1 year of experience** as a Full Stack Developer or similar role.

- Strong proficiency in **AngularJS** (not Angular 2+).

- Experience in building APIs and backend systems using **NestJS** (Node.js framework).

- Working knowledge of **MongoDB**, including schema design and queries.

- Familiarity with RESTful APIs, authentication (JWT/OAuth), and basic security best practices.

- Good understanding of version control using **Git**.

- Strong problem-solving skills and the ability to work independently.

- Basic understanding of deployment practices and CI/CD pipelines is a plus.

Education:

- Bachelor's degree in Computer Science, Engineering, or a related field (preferred, not mandatory).
